

Getting Connected to TSTAR

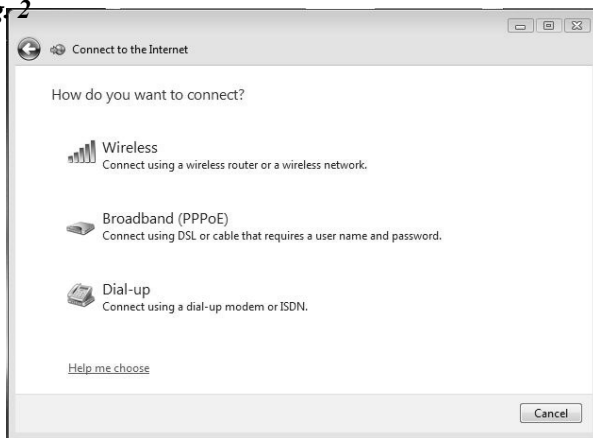

Using Windows Vista

These instructions are for **Windows Vista** (all versions). It is very important that you complete all steps to successfully make a connection to TSTAR. If you do need to call TSTAR for assistance, please have your "Account Setup Information" sheet for reference.

Configuring your TSTAR dial-up connection:

1. Open **Internet Explorer** from the desktop.
2. Click **Tools** on the left side of the screen
3. Under tools click on **Internet Options**
4. Click on the **Connections** Tab (see *fig. 1*)
5. On the connections tab click on the **Setup** button.
6. On the next screen (see *fig. 2*) select **Dial-up** from the list. (*please note that your screen may not have wireless and broadband listed in the window*).

Fig-2

7. On the next screen you will see fields asking for the **Dial-up Phone Number**, the **User Name**, the **Password**, and then the **Connection Name**. (see *fig. 3*)
8. Type the phone number provided for your dialing area in the "Dial-up Phone Number" field.
9. Then type the Username from your "account setup information" sheet, into the "Username" field.
10. Enter your Password into the "Password" field. (below this field are two check boxes, these are optional, however we suggest leaving them checked)
11. In the "Connection Name" field enter **TSTAR**
12. **If you have multiple users on your computer** then you must place a check next to "Allow other people to use this connection" in order to allow them to also connect to TSTAR.
13. *Make sure you phone line is connect before completing the following step!*
14. Click **Connect** at the bottom of the screen.
15. Let the computer dial and confirm the connection (see *fig. 4*), and your connection is now setup.
